

Thin-Crete™

STAMPED CONCRETE OVERLAY SYSTEM

PATIOS ▲

Thin-Crete™ is a stamped concrete overlay system designed as a cover-up for existing concrete surfaces.

Thin-Crete™ duplicates the look of natural stone, slate, granite, brick and even wood, in realistic deep relief patterns, over existing concrete surfaces eliminating the hassle and expense of concrete replacement.

Applied at 1/4 to 3/8 of an inch over existing slabs, *Thin-Crete™* is actually stronger and more durable than concrete making it the perfect surface for residential and commercial use in applications ranging from pool decks, patios and driveways to hotel lobbies, shopping centers and retail stores.

Whatever your application, *Thin-Crete™* can be colored and textured to match any design theme or specification giving you an incredibly versatile flooring system that's as durable as it is beautiful. Transform your existing concrete into a beautiful and elegant surface with *Thin-Crete™*.
